

Asbestos

The history of asbestos cannot be written without a prominent mention of FormanWatkins. Our firm has tried dozens of cases, from New York to California and everywhere in between. We have represented hundreds of defendants involving all types of claims. From manufacturers to distributors to premises owners, our experience covers the spectrum of defendants. While FormanWatkins possesses a great depth of trial experience, we have also settled over one billion dollars worth of cases in every major jurisdiction in the United States. We were the leaders in MDL 875 in obtaining dismissals for our clients in tens of thousands of cases based on medical screening issues. Our efforts in the screening fraud area led to the withdrawal and disqualification of over a dozen doctors in cases across the nation. While experience is important, our unrivaled creativity has led to our continued successes for our clients. FormanWatkins is *the* firm that leads asbestos litigation in the country.

At FormanWatkins, we apply decades of knowledge of the shifting, sometimes cyclical legal trends in asbestos litigation to an ever-evolving universe of claims, and develop solutions for each case. We serve as national coordinating counsel, national trial counsel, and/or negotiation counsel for multiple defendants. With FormanWatkins, you know you're getting the best and most accomplished asbestos litigation firm in the country.
