

Environmental Litigation

One of our core strengths lies in environmental and toxic tort litigation. Over 30 of our attorneys have represented landowners and manufacturers in claims alleging property damage and personal injury from environmental exposure. Cases like these require more than just litigation strategy. We tactically involve public and community relations strategy and make it our mission to find a way to end the litigation to ensure claims like these do not happen again for our clients.

Our successful experience includes:

- Oil Field Contamination
- Release from Manufacturing Plant
- Lead Paint Contamination
- Release from Refinery
- Chemical Release into River
- Former Refinery Worker Claims
- Rendering Facility Litigation
- Contaminated Landfill
- Wood Preservative Cases

As always, the best source of information about our abilities comes from our clients. We will be happy to provide you with references.
